Description

The Restaurant Reservation System is a simple project developed using PHP. The project contains only the user side. The users can go through the homepage, about, and contact pages. In order to make the reservation for a table, the user has to create an account and sign in or log in. This project makes an adequate way for users to make tables reservation online.

Talking about the features of this system, it contains only the (customer) section. The customers can go through the site and make a reservation of tables if they want. The design of this system is simple so that the user will not get any difficulties while working on it.

Technologies Used

HTML/CSS

•

JavaScript

•

Bootstrap

•

JQuery

•

XAMPP(PHP, MySQL)

Steps To Start Project
